**EX-IN SECURITY SERVICES LIMITED**

# Who We Are

**Ex-In** is an emerging security company that specializes in providing custom security solutions for corporate organisations, industrial set ups and residential gated communities.

Our services encompass the whole gamut of installation and maintenance of security systems and equipment like CCTVS, Access control systems, Perimeter electric fences, Automatic intruder alarm systems and Fire alarm systems. The ambit of our service repertoire also extends to Manned guard services, Emergency response units, Dog patrols and Security audits.

We design and install intelligent security systems that afford our clients safer and more secure business and home premises. After installations, we provide extensive training and support to your technical staff so that they are proficient and confident in managing the systems. Through our service level agreements, we also offer maintenance options.

**VISION** To be the preferred security service provider in the country and the region

**MISSION** To consistently provide customized professional and reliable security services for our clients

**VALUE** In all our undertakings we value:

- Professionalism
- Integrity
- Innovation
- Team Work; and,
- We Are Service Oriented

**OUR BUSINESS PHILOSOPHY** the ex-in business Philosophy is defined by the quality and excellence. This has been acquired over time by having an open mind towards listening and learning. The end result is services and products that provide simple solutions to complex security situations.

## **Engagement Model**

We believe in tailored solutions. As a result, our experts ask the right questions and listen whilst conducting security audits to discern the best fit.

A technical proposal of the right mix of equipment and services, in keeping with the latest technology and in line with your budget is then presented for approval.

Thereafter, implementation takes place using quality equipment manufactured by industry leaders. We go a step further by providing adequate training for your technical personnel to ensure capable hands are running the system. As a company, we are customer focused and relationship driven and therefore maintenance services and systems upgrades are a core value proposition in our repertoire. Over time, should your security needs change; we will be there to make the necessary adjustments in line with emerging threats.

## **Benefits Of Engaging Us**

- ❶ We pride ourselves in employing the best practices at every level of engagement and in line with international, PSIA and KSIA standards and code of ethics.
- ❷ We provide you with fastest response times on security alerts and maintenance needs.
- ❸ We ensure that our personnel are well prepared for tasks with periodic training. Our pride is in professionally done installations, using quality equipment and the latest systems.
- ❹ The EX -IN installation and maintenance technicians are easily identifiable with branded apparel, names tags and they are always well groomed.
- ❺ Our customer care centre coupled with the supervisory support structure coordinates all aspects of our service delivery ensuring proper direction and an integrated team approach and action.

## Security Installations

### ACCESS CONTROL SYSTEMS

The Ex-In access control suite allows you to automate and remotely manage and monitor your entrances, exits, work stations and other sensitive business areas from a central location. Further, the system provides you with options for managing employee entry privileges of various locations as well as keeping track of the comings and goings of workers, customers and visitors. The versatility

of the system is pivotal for businesses that require restricted access to confidential, hazardous or sensitive storage areas by preventing or recording unauthorized entry, internal and external theft.

The latest models incorporate office access finger print technology, a welcome addition, which enables organisations to manage payroll systems and keep tabs and lost man-hours at the workplace.

### CCTV INSTALLATION AND MONITORING

The Ex-In CCTV installation and Monitoring service provides high quality and secure real time video Surveillance using Commercial Grade Cameras. Security alerts are Captured live and response units sent on time to neutralize threats before they escalate. It features Access control, Remote Monitoring and an off shore Backup Storage. This system allows programming for transmission to a central control room from which pertinent information like vehicle registrations numbers and persons of interest can be flagged and run through a central data base for more options.

## Security Installations

### INTRUDER ALARM SYSTEMS

Prevent the threat of break-ins, robberies, intruders and vandalism before it happens with our intruder alarm system. It is adaptable to be fitted with a transmitter primed to relay a distress signal to the rapid response team in the event of activation. It features, motion detectors, panic buttons and sensors for doors, windows and other potential entry points. It is also GSM enabled, allowing it to pin point the exact areas of intrusion, and ping them to you cell phone.

### FIRE ALARM SYSTEMS & EQUIPMENT

Minimize the risk of property damage and loss of life with our Fire Alarm System. At the first signs of smoke or fire, the system sounds an alarm alerting appropriate Emergency Response Services.

The service involves the installation of smoke and heat detectors rigged to the Fire Alarm System, Fire Extinguishers and Sprinklers; and, routine maintenance to ensure that the equipment is operating at optimum capacity. The service also involves training the building occupants with evacuation procedures in case of a fire and conducting random fire drills for disaster preparedness.

### PERIMETER ELECTRIC FENCES

One of the most effective deterrents of unauthorized intrusion is our monitored Electric Fence. It administers an incapacitating high voltage shock to Intruders; triggers an Alarm if cut, short circuited, torn down or tampered with. The monitoring system also alerts clients and the response team of the breach. It comes in a freestanding mode, can be fixed atop a wall or attached to an existing fence.

# Our services

## MANNED GUARDS

From experience, **Ex-In** security has invested in having the right personnel from specific environments by employing a strategic staffing model that determines skill-set and attributes for manning sites in our portfolio. We train them in access and egress procedures, Emergency procedures, patrols, First Aid and counter terrorism.

We have security personnel available for full time dedicated requirements And mobile security patrols providing constant visual deterrents to potential Intruders. Our customer care and 24 hour resopnse centre ensures that we keep Track of our Manned Guards. Be assured that any situations will be swiftly dealt with.

## CANINE UNIT

In addition to regular guards, we also provide Trained **Guard Dogs**, **Sniffer Dogs** and **Attack Dogs** with experienced handlers. We own the dogs and employ the handlers. These pairs have formed close bonds making the partnerships more effective. They are trained to be calm with members of the public but at the same time to be very effective in deterring criminal elements.

# Our services

## EMERGENCY RESPONSE UNITS

**Ex-In** security provides Emergency response services to homeowners and businesses looking for peace of mind in the knowledge that no matter what time of day or night, equipped security personnel, placed in strategic positions, will attend their distress signals in a fast and efficient manner. Our officers are trained to notice suspicious persons or vehicles exiting the area. They also perform comprehensive perimeter fence and building checks for sign of tampering or forced entry and thereafter log status reports.

## SECURITY AUDITS

Conducting security audits is a key pillar of our service repertoire many business and home owners do not have an inkling of what their needs are when putting up a building, setting up a new office or commissioning sales yard. We provide security surveys and generate detailed reports to advise you on best systems and equipment a dopt in view of your needs. ## QUALITY CONTROL & QUALITY ASSURANCE

**Ex-In** applies stipulated international standards for supply and installation of security systems and equipment

We have made it a policy to use known brand names during installation projects these serve as the best since they are robust, can withstand diverse weather conditions and have perfect finishing making it difficult to be sabotaged

Quality equipment can be only be anchored on professional installations. We employ qualified personnel, who are well equipped to execute seamless installation and maintenance

Also or technicians come in official branded company apparel, easily identifiable and in pairs as per standard installation requirements. We conduct supervisory client visits twice a day to ensure that our personnel are reporting on assignments adequately kitted, well groomed and on time

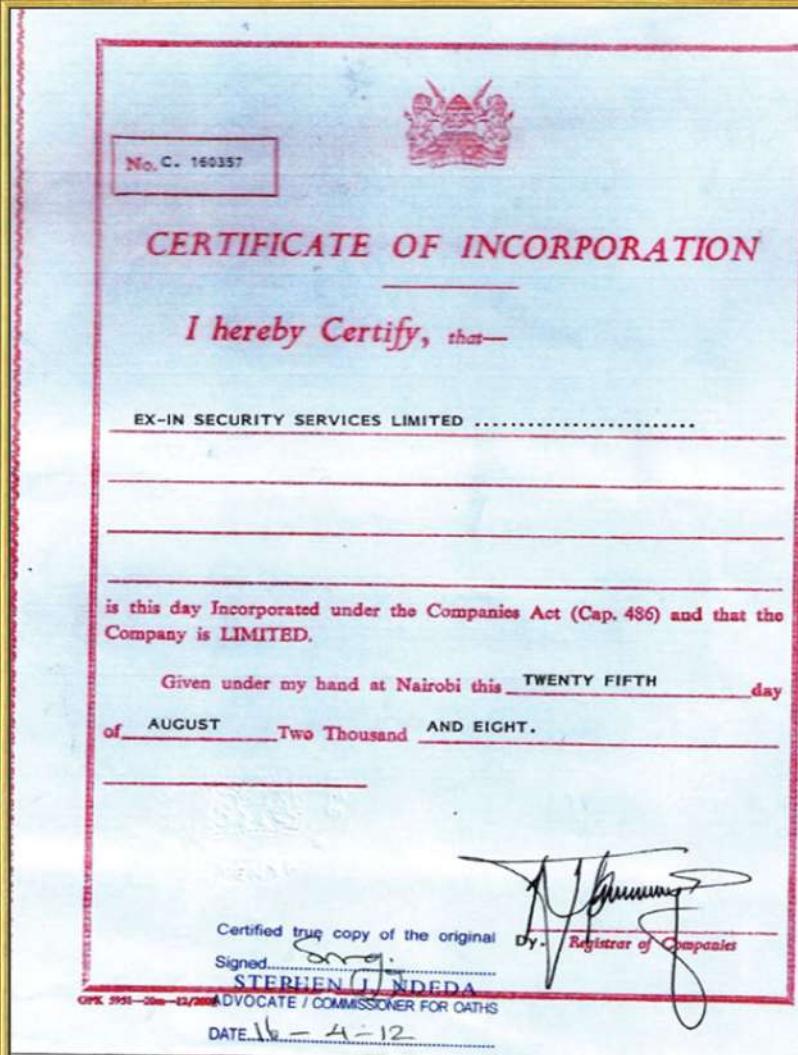

These routine checks are also backed up with impromptu checks to confer with our clients on any issue. Reports are then filled for immediate or future action.

We have customer care dedicated to speedy resolutions of issues in our quest for customer satisfaction.

At **Ex-In**, we subscribe to a systematic level of approval that safeguards sign offs at every stage of a project right from proposal presentation, proposal approval installation and maintenance. All these are backed by commissioning certificates and service sheets

We have a stringent guard recruitment process that focuses on physical height, mandatory secondary level graduate with a valid certificate, an age bracket of 24-40, at least three references drawn from area Chief, Pastor or Imam and a third individual with good standing in society and easily accessible. These stipulations are capped with a certificate of good conduct approved by **CID** headquarters passport Photos and copies of your National Identity Card.
